It plays a central role in providing users with the nicotine satisfaction they seek while minimizing harmful byproducts associated with combustion.
Fillers and Binders	To create a pouch that holds the nicotine, various fillers and binders are employed. These ingredients are carefully selected to ensure the pouches maintain their integrity and deliver nicotine consistently.
Flavorings	One of the distinctive features of 6mg nicotine pouches is the wide array of flavors available. These pouches often contain natural or artificial flavorings that enhance the overall user experience. Flavors range from mint and fruit to coffee and more, catering to diverse taste preferences.
